

# Unlocking Market Intelligence with Expert Market Data

## Empower Your Financial Insights

Expert is a web based application built to support research on JSE listed companies, African listed companies and South African parastatals.

It provides comprehensive historical end of day data including instrument prices, news, financials, shareholding and directorship details. This empowers users seeking to conduct in-depth research and make informed strategic decisions.

The platform's rich library of historical data helps you to save time and improve workflow efficiency by effortlessly allowing you to export content into Word or Excel documents for seamless reporting across multiple datasets.

Expert is trusted by professionals across research institutions, universities, law firms, and audit firms to drive informed, confident decision-making.

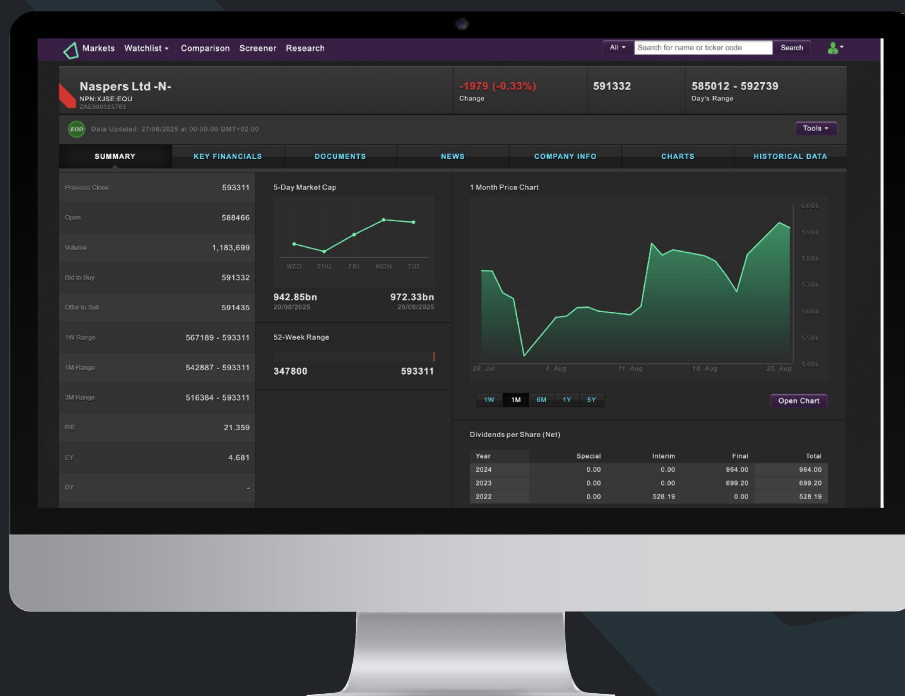

# Why Choose Expert Market Data?

## Depth and Breadth of Market Intelligence

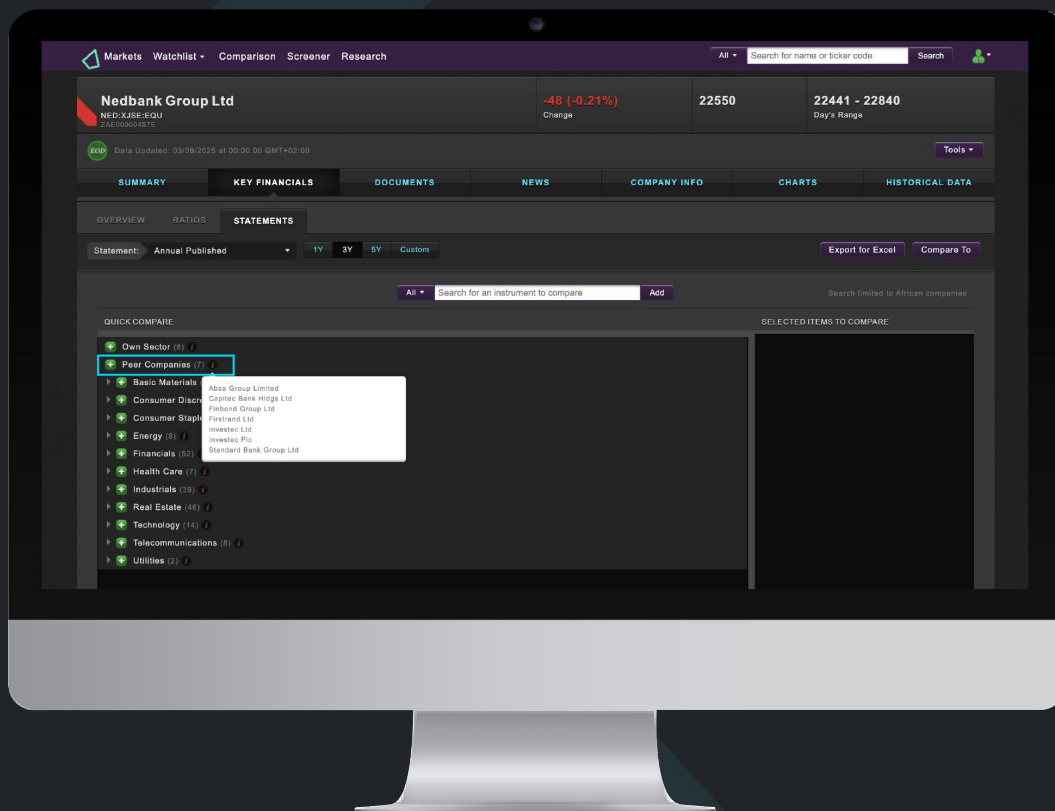

Access to a comprehensive repository of South African and African company information that empowers users to search, screen, compare, and report across all content types from a single interface.

- Full coverage of listed, delisted, and some parastatal SA companies back to 1990.
- Financial and statutory data for South African companies dating back to 1988.
- Financials for 19 listed African Exchanges.
- Access to company reports, SENS, corporate actions and dividend history.

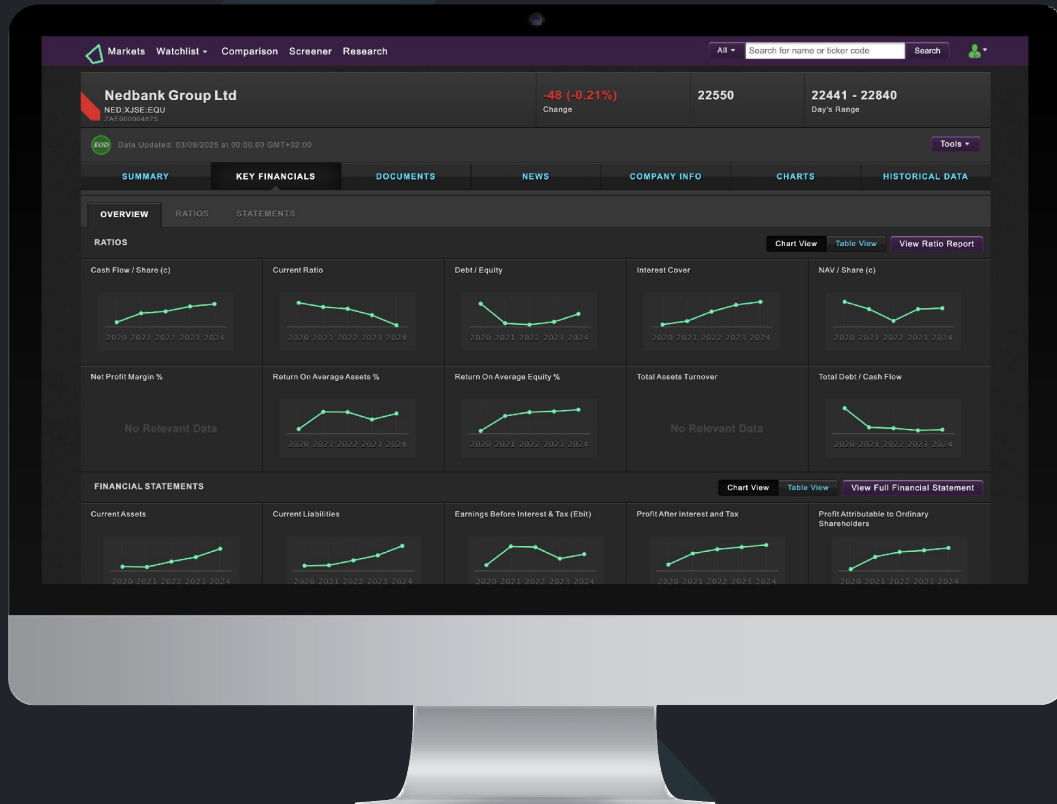

# Exclusive Access to CIPC Company, Auditor & Director Data

One of the only platforms to offer direct access to verified CIPC datasets to assist with verifying legitimacy and governance structures for investment or business engagement. Our CIPC database can also be used to gain insight into competitors or potential partners.

# Shareholding Transparency at a Granular Level

Make informed ownership and control assessments with JSE equity shareholding data down to 0.01% ownership level. Understand who controls or influences JSE-listed firms at any point in time—and have the ability to monitor historical and up to date changes in shareholding to uncover signals and shifts.

## Who Benefits from Expert

Expert provides professionals with reliable, in-depth and actionable insights into South African and African companies for investment, advisory, regulatory, or reporting purposes.

**Corporate Finance:** Historical financials, statutory filings, and market insights help support client transactions and regulatory reporting.

**Research Analysts:** Expert equips analysts with deep financial and market data, enabling detailed investment research and sector analysis.

**Corporate Strategy Teams:** Expert allows strategy teams to benchmark competitors, evaluate market opportunities, and track corporate developments. Access to company structures, management details, and ownership data supports informed strategic planning.

## Who Benefits from Expert

Expert provides professionals with reliable, in-depth and actionable insights into South African and African companies for investment, advisory, regulatory, or reporting purposes.

**Audit Firms:** Expert provides auditors with reliable financial statements, statutory filings, and historical data needed for compliance and verification. Centralised, credible data ensures accurate risk assessments and audit reporting.

**Universities:** Expert gives researchers access to extensive historical financial and market data across South Africa and Africa. Reliable datasets support comparative studies, publications, and in-depth academic analysis.

Used by professionals across research institutions, universities, law firms, and audit firms—Expert delivers the insights you need to stay ahead.
